I hereby declare that:

Each inventor's residence, mailing address and citizenship are stated below next to their name.

I believe the inventors named below to be the original and first inventor(s) of the subject matter which is described and claimed in patent number 6,453,767, granted September 24, 2002and for which a reissue patent is sought on the invention entitled Adjustable Vehicle Control Pedals

the specification of which

☒ is attached hereto.☐ was filed on _____ as reissue application number _____
and was amended on _____
(If applicable)

I have reviewed and understand the contents of the above identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

☐ I hereby claim foreign priority benefits under 35 U.S.C. 119(a)-(d) or (f), or 365(b). Attached is form PTO/SB/02B (or equivalent) listing the foreign applications.

I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described below. (Check all boxes that apply.)

☐ by reason of a defective specification or drawing.☒ by reason of the patentee claiming more or less than he had the right to claim in the patent.☐ by reason of other errors.

At least one error upon which reissue is based is described below. If the reissue is a broadening reissue, such must be stated with an explanation as to the nature of the broadening:

WARNING:

Petitioner/applicant is cautioned to avoid submitting personal information in documents filed in a patent application that may contribute to identity theft. Personal information such as social security numbers, bank account numbers, or credit card numbers (other than a check or credit card authorization form PTO-2038 submitted for payment purposes) is never required by the USPTO to support a petition or an application. If this type of personal information is included in documents submitted to the USPTO, petitioners/applicants should consider redacting such personal information from the documents before submitting them to the USPTO. Petitioner/applicant is advised that the record of a patent application is available to the public after publication of the application (unless a non-publication request in compliance with 37 CFR 1.213(a) is made in the application) or issuance of a patent. Furthermore, the record from an abandoned application may also be available to the public if the application is referenced in a published application or an issued patent (see 37 CFR 1.14). Checks and credit card authorization forms PTO-2038 submitted for payment purposes are not retained in the application file and therefore are not publicly available.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine and imprisonment, or both, under 18 U.S.C. 1001, and that such willful false statements may jeopardize the validity of the application, any patent issuing thereon, or any patent to which this declaration is directed.

APPENDIX A

REVISED SUPPLEMENTAL DECLARATION

Larry G. Willemsen and Gregory Scott Kolwich, co-inventors of the above-identified patent and Applicants herein, declare as follows:

1. Applicants believe the original patent to be partly inoperative or invalid by reason of the patentee claiming less than we had a right to claim in the patent. In particular, claim 1 claims "a drive mechanism mounted to said bracket, said drive mechanism having a rod connected at one end to said pedal arm, means for selectively moving said rod to pivot said pedal arm about said pedal arm pivot axis to adjust the position of said pedal arm with respect to said adjuster member." New claim 6 discloses "a drive mechanism extending between said adjuster member and said pedal arm, wherein said drive mechanism includes a screw rod operatively attached to said pedal arm to selectively position the pedal relative to the vehicle operator." New claim 6 overcomes the deficiency in claim 1 by disclosing the pedal adjuster described with respect to Figures 15-17 and in column 8, lines 29-67; column 9, lines 1-65; and column 10, lines 1-35. New claims 7-9 depend from claim 6, and claim 10 includes the features of claim 6 with additional limitations. These claims are also fully supported as indicated with respect to claim 6.

2. The error in claiming less than the patentee had a right to claim arose through error. This error occurred through inadequate communication between Applicants and their patent attorney during the original prosecution of the patent application resulting in the original patent. Specifically, Applicants failed to adequately communicate with their patent attorney during the original prosecution of this patent as to the important features of the invention now set forth in the newly submitted patent claims.

3. All errors which are being corrected in the present reissue application up to the time of filing of this declaration arose without any deceptive intention on the part of the Applicants.

4. Applicants have reviewed and understand the contents of the specification, including the claims, as amended by any amendment specifically referred to in the oath/ declaration.

5. Applicants believe the named inventors to be the original and first inventors of the subject matter which is claimed and for which a patent is sought.

6. Applicants acknowledge the duty to disclose to the Patent Office all information known to the Applicants to be material to patentability as defined in 37 C.F.R. 1.56.

7. Every error in the patent which was corrected in the present reissue application and is not covered by the prior declaration submitted in this application arose without any deceptive intention on the part of the Applicants.

8. Applicants offer to surrender the original patent.

We believe that all statements made herein of our own knowledge are true and that all statements made on information and belief are believed to be true; and that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under §1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application or any patent issuing thereon.
